Profile Summary

Software Developer Engineer at IBM with experience building and optimizing scalable backend and frontend systems for the Watsonx Orchestrate platform. Experienced in Python, JavaScript/TypeScript, API development, search systems, debugging, testing, and performance optimization. Strong foundation in data structures, algorithms, and software engineering, with hands-on experience developing production features in Agile engineering environments.

Education

NSS College of Engineering Palakkad, Kerala
Bachelor of Technology in Computer Science and Engineering; CGPA: 9.41/10 — *July 2026*

CMHSS Mannur North, Kerala
Higher Secondary (Class 12); Percentage: 98.92% — *March 2020*

GGVHS Feroke, Kerala
Higher School Education (Class 10); Percentage: 95% — *March 2018*

Technical Skills

Languages: Python, Java, C, TypeScript, JavaScript, SQL
Backend: Node.js, Express.js, Django, REST APIs
Databases Search: PostgreSQL, MongoDB, Milvus, OpenSearch
Engineering: Git, Automated Testing, Debugging, Performance Optimization, API Development
Cloud/AI: IBM Watsonx, IBM Cloud, Google Gemini API

Experience

Software Developer Engineer — **July 2026 – Present**
IBM ISL — *Kochi, India*

- Developed and optimized production features for the Watsonx Orchestrate Catalog platform, contributing to scalable backend and frontend systems.
- Developed catalog search and retrieval capabilities using backend APIs and search infrastructure, improving artifact discoverability and navigation.
- Integrated evaluation modules into the Catalog and resolved critical backend and frontend issues through debugging, testing, and performance optimization.
- Developed a global favorites mechanism for catalog artifacts, enabling users to efficiently manage and retrieve frequently accessed items.

Software Developer Intern — **Jan 2026 – July 2026**
IBM ISL — *Kochi, India*

- Collaborated within the Watsonx Orchestrate Catalog team to develop and optimize scalable backend and frontend features in an Agile engineering environment.
- Integrated Milvus and OpenSearch-based hybrid search, combining vector and keyword retrieval to improve catalog search relevance and artifact discoverability.
- Assisted in debugging, performance optimization, automated testing, and architectural improvements, contributing to production-ready software and transition to a full-time SDE role.

Software Developer Intern — **May 2025 – June 2025**
Bitzmatic — *Kozhikode, India*

- Assisted in requirement analysis, UI/UX design, and the end-to-end development of web applications.
- Executed rigorous testing and deployment processes, collaborating closely with the engineering team to deploy enhanced features for ongoing client projects.

Projects

Cook'n'Count | *TypeScript, Python, Google Gemini API, React*

- Built a pixel-themed smart kitchen assistant that uses audio detection to count cooker whistles and set automated cooking timers.
- Integrated the Google Gemini API to power an interactive AI chatbot ("Kunjuttan"), providing users with generative recipes and real-time cooking advice.
- Implemented mood-based music synchronization, allowing users to select their preferred mood and dynamically play suitable music while cooking.

EventHive | *React, Node.js, MongoDB*

- Developed a centralized campus community platform streamlining event participation and communication for college organizations.
- Engineered group-specific dashboards offering targeted analytics and engagement metrics for student leaders.

TinkerPulse | *Python, Django, Gemini API*

- Created an AI-powered platform for campus event planning, featuring automated calendar views and event analytics.
- Incorporated a Gemini-integrated chatbot to deliver smart scheduling suggestions and logistical support.

Leadership & Responsibility

Campus Lead **July 2024 – June 2025**
TinkerHub NSSCE *Palakkad, Kerala*

- Coordinated Kerala's largest women-only hackathon (TinkHerHack 3.0), the Useless Project Hackathon, and multiple TechHub sessions to foster technology adoption among students.

Class Representative **Oct 2022 – March 2026**
NSS College of Engineering *Palakkad, Kerala*

- Represented the CS batch over four years, coordinating academics, resolving student concerns, and facilitating a collaborative learning environment.

Design Team Member **Dec 2022 – July 2023**
FOSSNSS *Palakkad, Kerala*

- Collaborated on creative projects, designing posters, banners, and social media content to significantly enhance FOSS NSSCE's technical outreach.

Awards & Achievements

TCS CodeVita Season 13: Secured a Global Rank of 282 in the premier competitive programming contest.
Best All-Rounder Award: Awarded the Best All-Rounder title for the CSE Batch 2022–26 at NSS College of Engineering.
GATE Examinations: Successfully cleared GATE 2026 and GATE 2025 (All India Rank 11017).
Innovation Awards: YIP 7.0 Young Innovators Program District Level Winner (2025); secured 2nd Place at ASAP Idea Fest Kerala (2024).
Hackathon Triumphs: Winner of TinkerHub Web Master Challenge; secured 2nd Place at Hackfiesta v2.0, a 24-hour hackathon.
UI/UX Design: Secured 2nd Place in the STACS UI/UX Design Competition (2023).
Programming Competition: Secured 1st Prize in the C Programming Quiz conducted by IEEE (2023).
Workshop Facilitator: Conducted a hands-on Figma UI/UX Design Workshop for students as part of Stufenst.
